Good Afternoon Utah Wing,

Attached is a PRESS RELEASE announcing the successful relationship of CAP and the FAA as we launched the electronic integration of our safety education databases. CAP members will now receive automatic monthly safety education credit for FAASTeam / Wings accredited courses. To ensure credit, members must be signed up for the FAASTeam Wing's program (<http://www.faasafety.gov/>) and enter their current and accurate CAP ID in their FAA Wing's profile to start this data sharing. The FAA's Wing proficiency program is not limited to pilots and can be used by any of CAP's members to receive FAA and CAP credits.

If there are any questions, please let me know at jm.mettmann@gmail.com

This is a huge accomplishment in our growing relationship with the FAA. We look forward to hearing from CAP's members how this is value added. If you are using this new method, please keep your unit safety officer informed. I would like to track how many Utah Wing members are utilizing this service.

Thanks for your help and support. Have a Safe holiday!

Capt. Jason Mettmann
UTWG Director of Safety
